**DETAILED ACTION**

***Election/Restrictions***

1. Applicant's election with traverse of Group I in the reply filed on January 23, 2006 is acknowledged. The traversal is on the ground(s) that the PTO has not carried forward its burden of proof to establish that searching and examining the distinct Groups would be an undue burden. This was found persuasive. Consequently, the Restriction Requirement is WITHDRAWN. All claims are examined.

***Examiner's Statement of Reasons for Allowance***

2. Claims 1, 4-14 are allowed. The following is an examiner's statement of reasons for allowance:

In terms of claim 1, the prior art of record does not teach alone or in combination an anisotropically conductive film containing a plurality of conductive particles exhibiting magnetism with a diameter of 1 to 100 micrometers, the particles, being contained inside conductive path-forming parts formed in the anisotropically conductive film and a reinforcing material of insulating mesh formed of organic fiber, wherein the diameter of the mesh opening is less or equal to 500 micrometers and wherein the ratio of the diameter of the mesh opening to the diameter of the conductive particles is at least 1.5, in combination with all other elements in claim 1.

In terms of claims 4-10 and 12-14, the claims are allowed because they further limit allowable claim 1.

In terms of claim 11, the prior art of record does not teach alone or in combination a process for producing an anisotropically conductive connector including the step of forming, on a molding surface, a molding material layer obtained by incorporating a reinforcing material formed of insulating mesh or nonwoven fabric and conductive particles exhibiting magnetism into a liquid polymeric substance-forming material in combination with all other steps in claim 11.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US Patent Application Publication by Yamada et al. (2005/0258850 A1).
